This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

THE FIRST BOARD OF DIRECTORS

of this bank, when it was founded in 1836, included merchants and shipowners whose names are associated with the early development of New England commerce and industry.

The present Board of Directors of the National Shawmut Bank is made up of men actively identified with New England's commerce and industries.

The benefit of accumulated knowledge, experience and material resources resulting from this long and intimate contact with New England business is at the disposal of merchants and manufacturers.

PROFESSIONAL PUBLIC ACCOUNTANTS
AND
PRODUCTION ENGINEERS

The Bankers Service Company offers to its subscribers the following selected list of **Professional Public Accountants, Auditors, Industrial and Efficiency Engineers** in the principal financial, commercial, manufacturing and insurance centres of the United States, arranged in alphabetical order.

This compilation is made in response to a demand from our subscribers, not only for an authentic list of Public Accountants, etc., to whom they can entrust the most confidential and important part of their business, but also that the Banking Institutions, and other purchasers of securities, may be able to determine the professional standing of any Accountant or Auditor who may certify to financial or other statements presented to them. The Bankers Service Company has used great care in its selection of the organizations and individuals herein presented, and believes they represent the highest standing of Professional Accountancy in America.

The list is published exclusively in:

Directory of Directors in the City of Boston and Vicinity,
Directory of Directors in the State of Rhode Island,
Directory of Directors in the State of Connecticut,

is protected by copyright, and its publication in any other manner prohibited.
